- Discover Your Young Living Lifestyle booklet

## **Step 2: Essential Rewards Enrollment.**

It's a monthly customizable box that you will want to do. I call it the "Stitch Fix" for oils. You get to pick your order each month and you get points back that you can use for free oils/products each month. I have switched over most products in my house to Young Living, so don't just think it's for oils. I get laundry detergent, deodorant, make-up, skincare, body wash, etc. It's an amazing deal and I'm investing in non-toxic household products while I do it! The more I learn about what chemicals are in conventional lotions, make-up, dish soap, etc. the more grateful I am that I have found a company I truly trust.

**The monthly minimum is only \$50.** I'm gonna tell you now that I spent more than that at Kroger or Target buying the household items I needed anyway. If you ever decide to share oils with someone else and want to make some extra cash, then you place 100 PV (around \$100) a month so you can qualify for the full commission.

When you get to the question, "Would you like to enroll in Essential Rewards and earn free products?" My advice is to click "Yes."

On the follow-up question, "Do you want to use your Premium Starter Kit (PSK) as your first Essential Rewards (ER) order?" choose "Yes" again. Why? There are perks to using your PSK as your first ER order: You'll automatically meet the order requirements to enroll in Essential Rewards, you'll start earning points towards free products right away, and you'll earn an extra free product (which one depends on the month)!

## **Step 3: Set Up Your Monthly Essential Rewards Order**

Here is where you can add more products. There are some amazing Essential Rewards kits already designed for you *and* you can "Customize Your Kit." If you don't see what you're looking for in one of the other kits, choose "Customize Monthly Order." I highly recommend Cedarwood (\$11 = best sleep ever), Lime (\$12 = mood booster and great in water or NingXia Red), and Thieves Household Cleaner (\$22 = the only household cleaner we use for everything. It makes 40-50 spray bottles). Once you have next month's order set up, click "Save Monthly Order."

## **Continue Enrollment**

This is where you can "Add More Products" to your initial order. Anything you add here will be delivered along with your Premium Starter Kit. This is also the step where you'll be able to see which product you get for free! When you've updated your order with anything else you want this month, click "Checkout" at the bottom. It'll redirect you back to the enrollment screen where you'll click "Next."

On the next screen is where you will put in your personal information (name, mailing address, etc.) and create a username, password, and 4-digit PIN. Please write these down somewhere secure as this is the info you'll need to log back into your account. When you get down to commission processing info, click individual without social security number, unless you know you'd like to do the business. If you don't know for sure, you can always add your tax info later. Verify that my member number 12802506 (or the person who referred you to oils) is in both boxes under "Sponsor/Enroller Information." Check the box that confirms you have read the terms and conditions and click "Agree and Continue." Enter your payment and shipping information then checkout!

The best oils on the planet are now on their way to you! YAY!!

***Let me know when you're all set and I will send you your welcome kit in the mail to help you get started.***

*\*When you use my link to get your Premium Starter Kit, I earn a \$50 referral bonus. This directly supports me and my family. I truly appreciate every single person that uses my link! When you create a Young Living account, you will also have a referral link and can earn a referral bonus for each person who uses your link.*
